DETAILED ACTION

1. This office acknowledges receipt of the following item from the Applicant:
Information Disclosure Statement (IDS) filed on 4/13/04 and it was considered.
Papers submitted under 35 U.S.C. 119(a)-(d) have been placed of record in the file.
2. Claims 1-17 are presented for examination.
3. Claims 1-17 are allowed.

REASONS FOR ALLOWANCE

4. The following is an examiner's statement of reasons for allowance:
Claims 1-17 are considered allowable since the prior art made of record and considered pertinent to the applicant's disclosure does not teach or suggest the claimed limitations. The prior art does not teach the claimed invention of a memory device having in combination with other features, an erase control area set in which the number of data erase is stored as being expressed by a series of two-value data, the number of "0" data at lower bit side thereof indicating an accumulated value of the number of data erase in a block and wherein the number of data erase is read out before data erase for a selected page in said block by a check-read operation in which plural pages are simultaneously set at a selected state, and renewed and written into said selected page after data erase.
5. Prior art also does not disclose a register circuit for temporarily holding the number of data erase read in said redundant sense amplifier circuit from said redundant area before data erase; a data transfer circuit configured to transfer the number of data

erase read in said redundant sense amplifier circuit to said register circuit, and add one to the number of data erase held in said register circuit to renew and transfer it to said redundant sense amplifier circuit; and a judgment circuit for judging whether the number of data erase transferred to said register circuit reached to a permissible maximum value or not.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Aritome (6061280), Kobayashi et al (4811294) and Imamiya et al (5691941) discloses memory device having read/write/erase and verifying operation.
